

ZipWall® 12– 2-Pack

Ideal for professional contractors – both commercial and residential

Two spring-loaded steel poles secure a dust barrier up to 12 feet high and 10 feet wide. Innovative non-skid, non-marking head and plate. Package contains two poles with parts (heads, plates, and GripDisk™ non-slip pads).

Quick & easy to set up — no ladders, no tape, no damage.

ZipWall® 12 spring-loaded dust barrier poles are designed for the professional contractor. They are easy to use, easy to store, and a significant time saver! These poles are strong and lightweight, telescope up to 12 feet high and twist to lock. Each spring-loaded pole takes seconds to set up without a ladder. The innovative non-skid, non-marking head locks the barrier material, allowing it to be raised with the pole, and holds it securely in place without damaging the ceiling. A tight dust barrier can be set up in just a few minutes, one pole at a time, without ladders, tape, or damage.

The 2-Pack is ideal for adding to your ZipWall® Dust Barrier System.

Key features
