

## FEATURES

**Wattage**  
6

**Connector**  
ML

**Lifespan**  
50,000 hours

**Certification**  
UL

- Exclusively designed for LED products used indoors
- Switch mode power supply with 24VDC constant output voltage

## SA40654

**24V 6W Driver with 4 Port ML Block** - Use this driver with GREEN color coded products. The 6W driver is ideal if you have a small number of low wattage lights. This LED solution provides overload protection, open circuit protection, short circuit protection, and heat protection. The control gear will restart automatically after the fault conditions are removed for quick recovery of your lighting.
